

Fencing your home

The kids can't wait to get home from school. I love listening to them laughing and having fun.

Your front garden begins with the path from your fence to the front door. The fence you select forms an extension of your home and lifestyle.

Strength and reliability

A.R.C. garden fences are designed with strength and robustness to provide you with a long-lasting feature fence for your home.

- Choose from wire-based fencing with 5mm or 8mm diameter vertical wires.
- The “through-rail” designed tubular fencing range consists of vertical tubes welded and passed through the horizontal rails, instead of simply being face-welded.
- Steel and aluminium A.R.C. Fences provide 100% termite protection, unlike timber fencing.
- Corrosion resistance is achieved through galvanised finishes for steel fences as well as our complete range of aluminium fencing.

Environmentally Responsible

- All wire-based garden fencing is manufactured from 100% recycled steel.

Style and Choice

- Choose from the most extensive range of garden fences and gates to suit your taste and budget.
- Options available include: wire, tubular steel, tubular aluminium and metal picket fencing in a variety of colours, styles and finishes.

Warranty

A.R.C. Fences is proud to provide you with a comprehensive warranty, ensuring that your new fence is the best quality fence available.*

- 3 year warranty for pre-galvanised fencing.
- 5 year warranty for hot-dipped galvanised fencing.

*See back of brochure for full warranty details.

Dependability

- A.R.C. Fences have been manufactured in Australia for Australians since 1920.
- You can choose with confidence knowing that an A.R.C. Fence will add value to your home and give you peace of mind for years to come.
- Testing is conducted in a NATA (National Association of Testing Authorities Australia) accredited laboratory under controlled conditions.
- All wire-based fencing is manufactured to meet Australian Standard AS2423 “Coated Steel wire fencing products for terrestrial, aquatic and general use” for design, construction and performance requirements.

I love the long summer nights. Warm evenings outdoors with family and friends.

Tubular Fencing

Both a classical and contemporary look can be achieved with A.R.C. Fences tubular fence range. Tubular designs are available in a host of materials, finishes, sizes and colours. Tubular fencing incorporates a **'through-rail' design for maximum strength and robustness.**

The vertical tubes are strengthened by passing them through the top and bottom rails of the fence. This eliminates the need to have the tubes face-welded, where by the welds and tubes are exposed to possible breakage when repeatedly pulled or leaned on.

What's more, there is no front or back of the fence, so you'll be able to enjoy the fence from both sides. Tubular designs are available in a wide variety of materials and sizes, in a galvanised, aluminium or powder-coated finish*.

*I love the long Summer nights.
Is there anything better than a cool
drink on a warm night?*

Lassiter in Cream.

Steel styles: Lawson, Sturt, Blaxland, Bass, Lassiter, Leichardt, Bourke, Oxley, Wills, Jardine

*Options may vary from state to state. Please check with your local A.R.C. Fences representative on 13 15 57.

Wire-Based Fencing

Wire-based A.R.C. Fences are **manufactured using 100% recycled steel** and meet Australian Standard AS 2423.

Wire-based fencing provides distinct and elegant styles for your home and garden. Strength and security are achieved with the use of 5mm or 8mm diameter vertical wires.

To add that extra dimension to your garden fence the Banksia, Jacaranda, Garden, Wattle and Acacia styles feature a unique roll top and bottom design.

Styles: Willow, Wattle, Mayfair, Wentworth, Banksia, Jacaranda, Garden, Acacia

Choose from a variety of sizes. Styles are available in both a galvanised and powder-coated finish.*

Federation Wire in Smooth Cream 950mm.

Federation Wire in Smooth Cream 400mm.

Federation Fencing

Add style and old-world charm to both period and new homes with A.R.C. Fences Federation wire. The PVC-coated woven wire is available in four popular colours and does not require painting. The wire is both strong and flexible and can be installed to either pre-existing or new timber fence posts.

- Length:** 10 metre rolls
Height: 400mm, 950mm or 1250mm
Colours: Black, Smooth Cream, Green or Red

*Options may vary from state to state. Please check with your local A.R.C. Fences representative on 13 15 57.

You can't beat spending time in the garden. What better way to spend an afternoon?

Metal Pickets

A.R.C. Fences' range of metal picket fencing offers a viable substitute to traditional timber pickets.

Unlike timber pickets, the metal picket fencing systems are powder-coated so there is no need to spend further time and effort painting bare pickets.

- Style:** Flinders
- Length:** 2.4 metres
- Height:** 600mm, 900mm, 1200mm, 1500mm and 1800mm

Flinders in Smooth Cream.

Gates and Accessories

A.R.C. Fences can cater to all your fencing needs with gates and accessories to complete your new fence. Standard and made-to-order gates are available as well as posts and accessories such as post caps, spears for tubular fencing and latches.

Extensive range of accessories available.

Quality Assurance

When purchasing an A.R.C. Fence, look for the authentic A.R.C. Fences sticker. The sticker appears on the underside of the top rail on tubular A.R.C. Fences and on the underside of the bottom rail for wire-based A.R.C. Fences with top and bottom rails.

Authentic A.R.C. Fences sticker.

These colours are a sample only. A.R.C. Fences has a full range of decorative colours available. Conditions do apply for non-standard colours.

Fence Maintenance In order to keep your A.R.C. Fence looking good for years to come, follow these maintenance steps:

- Weekly brushing or hosing (using a pressure nozzle fitted to your garden hose) to remove any built up dirt, cobwebs or salt deposits.
- Bi-annual wash-down with warm water and a mild detergent. The frequency of the maintenance steps must be increased if your A.R.C. Fence is installed within 1500 metres of marine locations.

A.R.C. Fence Warranty - Terms and Conditions: *In addition to governing statutes, Smorgon Steel Reinforcing warrants that the STRUCTURE of A.R.C. Fences, gates and panel products sold to its customers will be free from manufacturing defects. The warranty is given subject to the following limitations: A. For Product Hot Dipped Galvanised After Manufacture: The warranty is given for a period of 5 years. The warranty does not apply if fencing is used within 1500 metres of a marine location. The warranty applies only if the maintenance procedures outlined in this brochure are adhered to. Proof of purchase will be required prior to admission of any warranty claim. Use of heavy cleaners, such as brick acids, will void the warranty. Smorgon Steel Reinforcing may repair or replace defective products at its absolute discretion. B. For Product Pre Galvanised: The warranty is given for a period of 3 years. The warranty does not apply if fencing is used within 1500 metres of a marine location. The warranty applies only if the maintenance procedures outlined in this brochure are adhered to. Proof of purchase will be required prior to admission of any warranty claim. Use of heavy cleaners, such as brick acids, will void the warranty. Smorgon Steel Reinforcing may repair or replace defective products in its absolute discretion. Powder-coated decorative finishes enhance the appearance of your A.R.C. Fence and are not covered by this warranty as their quality depends on numerous factors outside the control of Smorgon Steel Reinforcing. This warranty only applies to products installed in accordance with the manufacturers recommendations. In the event of a warranty enquiry, contact the place of purchase or Smorgon Steel Reinforcing.
