BONDCRETE

Bondall BondCrete is an extremely versatile bonding and sealing agent widely used in the building and renovating industry.

BondCrete has many uses that include:

Toppings & repairs, rendering & plastering, tile fixing & grout, sealing, binding & dust proofing, carpentry joinery and general craftwork. This product is not suitable for wet areas and waterproofing applications.

Sizes available - 250 ml, 500 ml, 1L, 2L, 4L 15L, 20L & 200L

Features & Benefits

- Versatile bonding and sealing agent
- Exclusive resin additive ensuring maximum bonding strength
- No need to hack, chip or acid etch most surfaces before bonding
- Concentrated high solid product, providing a high dilution ratio, ensuring users get value for money

CRAFTBOND

Bondall Craftbond is a versatile PVA adhesive designed for craft work and hobbies.

Features & Benefits

- Repairs and strengthens joinery
- Inexpensive
- Dries clear
- Quick drying
- Non-toxic
- Multi-purpose
- Adheres to most surfaces

BORE & RUST STAIN REMOVER

Bondall Bore & Rust Stain Remover is designed to remove unsightly bore, rust and tannin stains on concrete, brickwork, pavers, painted surfaces and fibro sheeting prior to sealing with **Bondall** sealers or before painting.

Sizes available - 750ml & 5L

Features & Benefits

- Efficiently removes light bore, rust and tannin stain
- Easy to use

EFFLORESCENCE STAIN REMOVER

Bondall Efflorescence Stain Remover is a phosphoric acid based product designed to remove most unsightly white powdery stains (calcium carbonate) that appear on brickwork, pavers, concrete work and rammed earth blocks prior to them being coated with **Bondall** Sealers.

Sizes available - 2L & 5L

Features & Benefits

- Easy to apply and use
- Fast acting
- Can be used as an etching agent for concrete

MOSS & MOULD ELIMINATOR

Bondall Moss & Mould Eliminator is a very effective remover of moss and mould from brick pavers, walls, roof tiles and most porous surfaces.

It is useful for surface preparation prior to treatment with **Bondall** sealers.

Sizes available - 2L & 5L

Features & Benefits

- Powerful remover of moss and mould
- Does not contain Chlorine
- Suitable for interior and exterior use
- Safe to use on fabric and painted surfaces

MULTI PURPOSE DEGREASER

Bondall Multi Purpose Degreaser is a powerful, concentrated liquid cleaner that removes ingrained dirt, grease and oil deposits and most automotive fluids without damaging the surface.

It is ideally suited for use on garage floors, driveways and paved areas prior to sealing, or if a much needed clean is due.

Sizes available - 750ml & 5 L

Features & Benefits

- Biodegradable making it safer for the environment
- Fast acting
- Non caustic and non solvent based

TYRE RUBBER AND TAR REMOVER

Bondall Tyre Rubber and Tar Remover is a specially formulated gel designed to remove tar marks and tyre rubber from pavers, concrete, clay bricks, limestone and stone surfaces.

Sizes available - 1L

Features & Benefits

- Low toxicity
- Removes marks rapidly
- Easy clean up with water

VANADIUM STAIN REMOVER

Bondall Vanadium Stain Remover is designed to remove the unsightly yellowish green stains that sometimes appear on light and buff coloured clay bricks and pavers.

Sizes available - 1L

Features & Benefits

- Very effective remover of unsightly vanadium stains
- Alkaline based

MOULD RID

Mould Rid is a very effective remover of mould and mildew from kitchen, laundry and bathroom areas.

Sizes available - 750ml

Features & Benefits

- Very effective remover of mould, moss and mildew
- Does not contain chlorine
- Suitable for interior and exterior use
- Safe to use on fabric and painted surfaces

TILE & GROUT CLEANER

Tile & Grout Cleaner is a powerful, ready to use, fast working cleaner. It removes most ingrained dirt, grease, grime and oil deposits without damaging the surface. It is non-caustic making it safer for the environment.

Sizes available - 750ml

Features & Benefits

- Ready to use
- Safe for the environment
- Fast acting

GARAGE & FACTORY FLOOR PROTECTOR

Bondall Garage & Factory Floor Protector is formulated on a modified polyurethane alkyd resin that provides a tough hardwearing film with good abrasion resistance and excellent durability.

It is primarily intended for use on concrete floors, but can also be used on brick, stone and timber if required.

Colours: Granite Grey and Deep Blue

Sizes available - 4L & 10L

Features & Benefits

- Single pack
- Contains "Slip-guard" to reduce slipping
- Forms a tough hard wearing film
- Good abrasion resistance
- Excellent durability
- Low sheen finish
- Tintable

POLYURETHANE PAVING PAINT

Bondall Paving Paint is formulated with a polyurethane modified alkyd resin and added slip-guard. This product provides a tough hardwearing film with good abrasion resistance and excellent durability. It is primarily intended for use on concrete floors, but can also be used on brick, stone and timber if required.

It is ideal for use on driveways, paths, carports, warehouse and garage floors, timber decking and boat decks.

Sizes available - 2L, 4L & 10L

Features & Benefits

- Meets CSIRO standards AS3611.1 & AS4586.1999
- Tough, hard coating for commercial and domestic use
- Contains "Slip-guard" to reduce the danger of slipping
- Excellent durability
- Good abrasion resistance for hard wearing conditions
- Excellent adhesion and low sheen
- Interior and exterior use
- Range of fashionable colours
- Tintable

RIDGE POINTING COMPOUND

Bondall Ridge Pointing Compound is a highly flexible pointing compound with excellent adhesion properties. It will provide long term durability under harsh Australian conditions.

Bondall Ridge Pointing Compound is suitable for use with old and new ridge capping.

Colours: Terracotta, Charcoal, Red Earth, Paintable Grey

Sizes available - 4L & 10L

Features & Benefits

- Ready to use
- Excellent adhesion
- Good flexibility
- Good water resistance
- Easy trowel application
- Towels to a smooth finish
- Durable

RENDER FINISH

Bondall Render Finish is a unique, water based coating designed for direct application to bricks, concrete, fibro cement and masonry. It is formulated to produce a tough, flexible and rendered, textured look. When fully cured, it has a film build 4 times that of conventional paint, thus providing long life protection from the extremes of weather.

Colours: Dark Anotec Grey, Limestone, Terracotta, Paintable Grey

Sizes available - 4L & 10L

Features & Benefits

- Creates refreshing looks for old and boring brick work
- Easy to apply with a sponge
- Unlike render, does not need a colour topcoat
- No undercoat required
- Suitable for DIY operators
- Fills raked joints up to 10mm without cracking
- Superior water resistance
- Can produce unique patterns if desired

TEXTURED EFFECTS

Bondall Textured Effects is a waterborne modified acrylic coating with high adhesion and strength, high water repellence.

For use on planters, garden features, terra cotta clay pots and broad wall surfaces for both exterior and interior conditions to give a decorative textured effect.

Colours: Mexican Blue, Ivory Yellow, Spanish Terracotta, Classic Limestone

Sizes available - 1L & 4L

Features & Benefits

- Provides good adhesion and strength
- Good water resistance and repellence
- Acrylic based
- Great for planters, garden features, terra cotta clay pots and broad wall surfaces
- Interior and exterior applications

POLBOND 4000

Bondall Polbond 4000 gives a high strength bond on a variety of timbers and is particularly suited for cold press lamination of Formica to chipboard.

Sizes available - 20L & 200L

Features & Benefits

- Provides a high strength bond
- Versatile
- Dries very hard
- Dries clear
- Non staining

POLBOND 7000

Bondall Polbond 7000 is a strong and versatile woodworking PVA adhesive with very quick setting time.

High quality PVA woodworking adhesive designed for fast drying and bonds of high tensile strength.

Sizes available - 20L & 200L

Features & Benefits

- Extremely strong
- Good water resistance
- Quick setting
- Non-staining
- Non-irritant to the skin
- Moisture and humidity resistant
- Does not run on vertical surfaces

FW5 FUNGICIDAL WASH

Bondall FW5 Fungicidal Wash is a highly effective bacterial, fungal and algal wash specifically formulated to remove moss, mould and lichen growth off roofs and other surfaces.

Sizes available - 20L

Features & Benefits

- Easy to use
- Highly concentrated
- Can be used on a wide variety of surfaces

CERAMIC FORTIFIED ACRYLIC ROOF COAT

Bondall Ceramic Fortified Acrylic Roof Coating (CFA) is a pure acrylic roof coating specially designed for high quality exterior applications.

Bondall CFA Roof Coat is designed for coating weathered and faded concrete cement, terra cotta and corrugated iron. It is available in a range of popular colours.

Sizes available - 20L

Features & Benefits

- An attractive new looking roof appearance
- Stays cleaner and has longer gloss retention
- Superior resistance to moisture, dirt and contaminations
- Early water resistance
- Fast film drying speed
- Early walk on properties
- Broad spectrum algal and fungal protection

WAPOL ROOF SEALER

Bondall Wapol Roof Sealer is formulated from a specially selected waterborne resin. It provides excellent penetration into weathered concrete/cement or other porous surfaces.

Sizes available - 20L

Features & Benefits

- Contains a specially formulated waterborne resin
- Provides excellent penetration
- Promotes adhesion of further coats

WAPOL ROOF PRIMER

Bondall Wapol Roof Primer is based on a vinyl copolymer emulsion. It is designed to promote adhesion between metal primers and paint on treated metal roofs

Sizes available - 20L

Features & Benefits

- Easy to use
- Waterbased
- Fast film drying speed
- Easy walk on properties

WAPOL ROOF GLAZE

Bondall Wapol Roof Glaze is a hard wearing, pure 100% acrylic clear finish specially designed for application to old or newly painted tiles and to re-glaze old terra cotta tiles.

Sizes available - 20L

Features & Benefits

- An attractive new looking roof appearance
- Stays cleaner and has longer gloss retention
- Repels moisture, dirt and contamination better
- Early water resistance
- Fast film drying speed
- Broad spectrum algal and fungal protection

BONDCRETE

Bondall BondCrete is an extremely versatile bonding and sealing agent widely used in the building and renovating industry.

BondCrete has many uses that include:

Toppings & repairs, rendering & plastering, tile fixing & grout, sealing, binding & dust proofing, carpentry joinery and general craftwork. This product is not suitable for wet areas and waterproofing applications.

Sizes available - 250 ml, 500 ml, 1L, 2L, 4L 15L, 20L & 200L

Features & Benefits

- Versatile bonding and sealing agent
- Exclusive resin additive ensuring maximum bonding strength
- No need to hack, chip or acid etch most surfaces before bonding
- Concentrated high solid product, providing a high dilution ratio, ensuring users get value for money

HYDROCRETE

Bondall Hydrocrete is a water-resistant bonding and sealing agent.

It provides outstanding resistance to hydrolysis and is a perfect admixture for concrete and cement mortars.

Sizes available - 1L, 4L, 15L & 200L

Features & Benefits

- Water resistant
- Perfect for wet areas and exterior applications
- Contains a styrene-butadiene latex to provide excellent adhesion
- Ideal admixture for cement
- Bonds concrete to glass and metal

SILASEC

Bondall Silasec is a concentrated liquid waterproofing compound designed to be used with Type GP Cement to form a permanent waterproofing barrier on masonry and concrete structures and floors.

Sizes available - 1L, 2L, 4L, 15L & 200L

Features & Benefits

- Forms a permanent waterproofing barrier
- Waterproofs renders or toppings
- Waterproofs fishponds and pools
- Waterproof tile grout for showers
- Waterproofs cement repair putty
- Can be used on above or below ground applications
- Can be used on interior or exterior applications

DAMPCOURSE

Bondall Dampcourse is a clear additive for use with cement mortar for laying. The use of this admixture helps to prevent the capillary movement of water up a masonry wall above the mortar level.

Sizes available - 4L, & 15L

Features & Benefits

- Prevents rising damp

PLASTICISER

Bondall Plasticiser is an additive when mixed with a cement mortar allows greater workability and can be used as a partial or complete replacement for lime at a fraction of the cost.

Sizes available - 4L, & 15L

Features & Benefits

- Allows greater workability of mortar
- Cost effective

BALLISTOL

Ballistol is an extremely affective and versatile product, used to lubricate mechanical parts. It also acts as a corrosion inhibitor. General uses include motor vehicles, boats, bikes etc.

There are no equivalents on the market place that offer the same level of lubrication, cleaning and protection as **Ballistol**.

Ballistol can also be used to treat plastic and leather dash boards.

Sizes available - 50ml, 200ml, 400ml & 500m pure oil

Features & Benefits

- Lubricant & corrosion inhibitor
- Neutralises acidic residues
- Waterproof leather and prevents mildew
- Preserves wood in extreme damp or dry
- Cleans all metals
- Disinfects
- Biodegradable & non toxic
- Miscible in water
- Electrically insulating
- Ultra violet filtering
- Never gums up

BONDCRETE

Bondall BondCrete is an extremely versatile bonding and sealing agent widely used in the building and renovating industry.

BondCrete has many uses that include:

Toppings & repairs, rendering & plastering, tile fixing & grout, sealing, binding & dust proofing, carpentry joinery and general craftwork. This product is not suitable for wet areas and waterproofing applications.

Sizes available - 250 ml, 500 ml, 1L, 2L, 4L 15L, 20L & 200L

Features & Benefits

- Versatile bonding and sealing agent
- Exclusive resin additive ensuring maximum bonding strength
- No need to hack, chip or acid etch most surfaces before bonding
- Concentrated high solid product, providing a high dilution ratio, ensuring users get value for money

BONDCRETE SBP

Bondall SBP (Seal, Bind and Prepare) is a versatile sealing, binding and priming agent for interior and sheltered exterior use.

This water based product is designed to seal and bind porous, powdery surfaces while it also primes the surface prior to applying waterborne decorative paints.

Bondall SBP can be applied to brickwork, stonework, decorative render and concrete floors to prevent oil, dust and stain penetration. Ideal for use on surfaces prior to carpeting.

Sizes available - 1L & 4L

Features & Benefits

- Reduces porosity of surface
- Easy and ready to use
- Multi-purpose
- Waterbased
- Durable
- Environmentally friendly

NATURAL FINISH SEALER

Bondall Natural Finish Sealer is a revolutionary, penetrating, film forming water based sealer. It is ideal for sealing concrete, clay, natural stone, brickwork, large format paving and reconstituted limestone pavers on patios and other areas. Suitable for use around swimming pools

Sizes available - 2L, 5L, 15L & 200L

Features & Benefits

- Water resistant
- One day application wet-in-wet formula
- Seals, binds and protects most masonry surfaces
- Assist with reducing efflorescence
- Resists algal and fungal growth
- Enhances natural colour of surface
- For horizontal and vertical surfaces
- Interior and exterior use

PAVING & CONCRETE SEALER

Bondall Paving & Concrete Sealer is a hard wearing acrylic clear finish for coating clay or concrete pavers, concrete floors, unglazed tiles and slate.

This product is not recommended for use around wet areas e.g. swimming pools

Sizes available - 5L, 15L & 200L

Features & Benefits

- Hard wearing
- Dust proofs
- Enhances natural colour of surfaces
- Protects from staining and soiling
- Highly trafficable
- Interior and exterior use

NATURAL LIMESTONE & SANDSTONE SEALER

Bondall Natural Limestone & Sandstone Sealer is a clear 100% acrylic sealer designed to seal and bind most natural masonry vertical surfaces.

Bondall Natural Limestone & Sandstone Sealer is formulated with special UV resistant resins to increase surface hardness and help against staining, soiling, algal and fungal growth.

Sizes available - 5L & 15L

Features & Benefits

- Seals, binds and protects most vertical masonry surfaces
- UV resistant
- Protects against staining and soiling
- Algal and fungal resistant

LIMESTONE SEALER

Bondall Limestone Sealer is a siloxane based sealer designed to seal, bind and repel moisture from natural and reconstituted limestone surfaces.

Sizes available - 10L

Features & Benefits

- Water based
- Non-alkaline
- Not harmful to glass or aluminium surfaces
- User-friendly
- Binds & strengthens limestone surfaces

POOL PAVING SEALER

Bondall Pool Paving Sealer is a clear solvent based water repellent/sealer for salt and chlorinated pool surrounds. It forms a water repellent barrier and allows the treated surface to breathe enabling moisture vapour to escape whilst protecting against water penetration and damage.

Sizes available - 1L, 4L & 15L

Features & Benefits

- Non film forming
- Suitable for salt water & chlorinated pools
- Reduces efflorescence
- Suitable for most porous pavers

MULTI SURFACE WATERPROOFER

Bondall Multi Surface Waterproofer is an effective, all purpose transparent water repellent that penetrates dry, porous, exterior surfaces to form a water repellent barrier which helps to prevent water damage.

Bondall Multi Surface Waterproofer allows the treated surface to breathe enabling moisture vapour inside to escape whilst protecting against water penetration and damage. It is not recommended for protection against total immersion in water.

Sizes available - 1L & 4L

Features & Benefits

- Penetrating sealer
- Allows the surface to breathe
- Usable on a variety of surfaces
- Can be painted over

THOMPSON'S WATER SEAL

Thompson's Water Seal is a transparent, solvent based water repellent that is designed to penetrate dry, porous, exterior substrates to prevent ingress of moisture.

Thompson's Water Seal is unique in its versatility in waterproofing most porous building material such as brick, concrete, wood, stone, slate etc and also natural fabric such as cotton and canvas.

Sizes available - 1L, 5L Bonus & 20L Bonus

Features & Benefits

- Transparent
- Low viscosity
- High penetration
- Solvent based
- Perfect for brick, concrete, masonry, slate and wood substrates

THOMPSON'S WATER SEAL ULTRA

Thompson's Water Seal Ultra is a unique high performance transparent water repellent that penetrates exterior brickwork and cementitious substrates.

It is suitable for exterior brickwork, pointing, rendering and concrete type surfaces. It is not suitable for wood substrates.

Sizes available - 1L & 5L

Features & Benefits

- Transparent
- Lasts twice as long as most conventional water repellants
- One coat is normally sufficient from most substrates
- Non-staining
- Low viscosity
- High penetration

POT SEALER

Bondall Pot Sealer is the ideal choice for sealing pots after they have been suitably prepared with **Bondall Pot & Ornament Cleaner**.
It will seal, bind, protect and waterproof most pot surfaces while still retaining a clear natural look.

Sizes available - 750 ml

Features & Benefits

- Increases surface hardness
- Seals, binds and protects
- Gives a clear natural look
- Outstanding exterior durability
- Reduces staining and soiling
- Resists algal and fungal growth

POT & ORNAMENT SEALER

Bondall Pot & Ornament Sealer is an easy to use masonry sealer.
This versatile sealer is the ideal choice for sealing pots and ornaments, after they have been suitably prepared by **Bondall Pot & Ornament Cleaner**.

Sizes available - 1L & 4L

Features & Benefits

- Seals, binds, protects and waterproofs.
- Perfect for most vertical masonry surfaces
- Provides a clear natural finish
- Increases surfaces hardness
- Prevents staining and soiling
- Resists algal and fungal growth
- Very durable

MONOLAC

Bondall Monolac is a premium quality single pack, clear dressing for slate, natural stone, unglazed terra cotta tiles, quarry tiles, paving bricks and other natural decorative materials.
Bondall Monolac is based on a crystal clear acrylic resin.

Sizes available - 1L, 4L & 20L

Features & Benefits

- Enhances the natural colour of stone
- Prevents soiling
- Easy to apply
- Suitable for interior and exterior use
- Fast drying
- Hard wearing clear surface

SLATE SEALER

Slate Sealer is a single pack clear coating for slate, natural stone and various quarry tiles. It leaves a glossy finish depending on the porosity, texture and application.

Sizes available - 1L & 4L

Features & Benefits

- Water Based
- Enhances the natural colour of stone
- Easy to apply
- Suitable for interior and exterior use
- Fast drying
- Prevents soiling
- Hard wearing

TERRACOTTA SEALER

Terracotta Sealer is a clear penetrating solution that waterproofs unglazed terracotta tiles without leaving a slippery film coating.

Sizes available - 1L & 4L

Features & Benefits

- Water Based
- Water resistant
- User friendly
- Resilient to household chemicals
- Non-slip

TILE & GROUT SEALER

Tile & Grout Sealer is a clear penetrating solution that waterproofs unglazed tiles and grout without leaving a slippery film coating.

Sizes available - 1L

Features & Benefits

- Water Based
- Easy to use
- Invisible moisture repellent film
- Non-slip
- Water resistant

TINTABLE CONCRETE FLOOR SEALER

Tintable Concrete Floor Sealer is hard wearing water based clear finish for coating concrete floors and natural stone surfaces. It dust proofs, stabilizes and enhances the natural colour of the substrate and may be tinted to achieve a translucent finish.

A subtle wash effect can be achieved using 1/2 strength Watty! Accent base tints.

Sizes available - 4L

Features & Benefits

- Water Based
- Hard wearing
- Dust proofs
- Enhances natural colour of surface
- Trafficable
- Tintable
- Suitable for interior and exterior use

MONOCEL CLEAR TIMBER VARNISH

Bondall Monocel polyurethane is a durable single pack clear varnish for timber. It is available in 3 gloss levels, Ultra Gloss, Gloss and Satin.

Bondall Monocel is suitable for plywood, furniture, timber paneling, architraves and most other dressed timber surfaces, but is not recommended for use on rough sawn timber or Western Red Cedar or in trafficable areas.

Finishes: Satin, Gloss, Ultra Gloss

Sizes available - 500ml, 1L & 4L

Features & Benefits

- Suitable for interior and exterior
- Single pack
- Hard durable finish
- Excellent durability and gloss retention
- Contains NanoZ™ Transparent Zinc Oxide for superior protection against harmful UV degradation

MONOCEL GOLD

Bondall Monocel Gold is a marine grade varnish designed to provide maximum curability and colour retention, ideal for timber exposed to harsh exterior conditions.

Not recommended for use on rough sawn timber or in trafficable areas.

Finishes: Satin, Gloss

Sizes available - 500ml, 1L, 4L & 300G Aerosol

Features & Benefits

- Suitable for interior and exterior
- Single pack Aliphatic Polyurethane
- Contains NanoZ™ Transparent Zinc Oxide for superior protection against harmful UV degradation
- Very good adhesion to substrate
- Excellent abrasion and yellowing resistance
- Very good chemical and solvent resistance
- Available in convenient aerosol pack

MONOCEL STAIN & VARNISH - SATIN

Bondall Satin Stain & Varnish is a combined timber stain and clear polyurethane finish. It offers the convenience of a single product finish instead of a separate stain and clear system. It is suitable for use on most interior woodwork, built-in furniture, and paneling.

Bondall Satin Stain & Varnish is not recommended for MDF board, or floors.

Colours: Baltic Pine, Cedar, Jarrah

Sizes available - 500ml & 1L

Features & Benefits

- Suitable for interior and exterior
- Single pack stain and varnish
- Easy to use
- Contains NanoZ™ Transparent Zinc Oxide for superior protection against harmful UV degradation

MONOCEL DOOR STAIN & VARNISH

Door Stain & Varnish is a high performance single pack, transparent finish for timber doors. It provides maximum exterior durability and colour retention and features NanoZ™ technology.

Colours: Cedar, Jarrah, Golden Oak, Dark Mahogany

Sizes available - 1L & 4L

Features & Benefits

- Suitable for interior & exterior
- Contains NanoZ™ Transparent Zinc Oxide for superior protection against harmful UV degradation
- Available in 4 colours
- 3 year Warranty offered against cracking, blistering or peeling when used with as instructed with Monocel Gold.

DECKING OIL

Monocel Decking Oil is a high performance; UV enhanced naturally pigmented oil finish providing maximum exterior durability for timber decking.

Protects timber in exterior conditions, highlighting the natural beauty and extending the life of your timber.

Sizes available - 4L & 10L

Features & Benefits

- Triple protection for timber
- Contains NanoZ™ Transparent Zinc Oxide for superior protection against harmful UV degradation
- Water resistant
- Fungal protection

TIMBER EFFECTS

Bondall Timber Effects is a water based, translucent interior/exterior coating specially designed for application to fibre cement board and similar stable substrates to create a natural timber look.

Available in jarrah, cedar and natural finishes.

Colours: Natural, Cedar and Jarrah

Sizes available - 1L & 4L

Features & Benefits

- Produces a timber grain effect
- Superior resistance to dirt pick up
- Excellent exterior durability and film hardness
- Contains a strong fungicide
- Easy to clean, easy to use and non-toxic
- Very good water resisting characteristics

GP PRIMER SEALER

Bondall GP Primer Sealer is a water-based coating designed for application to fibre cement sheeting and similar stable substrates prior to application of **Bondall Timber Effects**.

Sizes available - 1L & 4L

Features & Benefits

- Gives excellent adhesion to hardi-board, fibre cement board and similar substrates
- Promotes excellent inter-coat adhesion
- Provides a good neutral background
- Provides an excellent key for **Bondall Timber Effects**
- Assists to overcome substrate colour variations
- Easy to use, easy to clean and non-toxic

ALL PURPOSE TIMBER SEALER

Bondall Monocel All Purpose Timber Sealer is a revolutionary penetrating 100% acrylic sealer designed to seal, bind, protect and is a water repellent, non-permanent sealer for most timber surfaces.

This product is suitable for untreated timber such as doors, cladding, railings, MDF etc.

Sizes available - 1L & 4L

Features & Benefits

- Easy to use
- Quick re-coating time
- Water clean up
- Water repellent

MONOGLAZE

Bondall Monoglaze is an economical and convenient clear timber floor varnish giving a hard, smooth, ultra high gloss finish for all kinds of interior timber floors and furniture.

Sizes available - 1L, 4L & 20L

Features & Benefits

- Fast drying
- Ready for light traffic in 4 hours and available for full use 24 hours later
- Exceptional tough abrasion resistance and durability
- Exceptional chemical, alcohol and water resistance for protection against spills
- Low odour, easy application and non toxic finish
- Applicators wash out in water

AQUATITE

Bondall AquaTite is a user friendly, brushable grey coloured waterproofing membrane designed to waterproof areas which are permanently immersed in water.

It is suitable for both interior and exterior use and meets Australian Standards.

It is not suitable for swimming pools, spas, glazed & semi-glazed surfaces or plastic pots.

Sizes available - 1L, 4L & 10L

Features & Benefits

- Forms a tough, flexible, seamless membrane
- Acrylic based
- Light grey in colour
- Resistant to algal and fungal growth
- Non-toxic/environmentally friendly

PONDITITE

Bondall PondTite is a user friendly, brushable waterproofing membrane designed for waterproofing fish ponds, fountains, water features, non-potable water holding tanks and reflection pools.

It is not suitable for swimming pools, spas, glazed & semi-glazed surfaces or plastic pots.

Bondall PondTite is suitable for both interior and exterior use.

Colours: Limestone, Blue Lagoon, Black and Sandstone

Sizes available - 1L & 4L

Features & Benefits

- Forms a tough, flexible, seamless membrane
- Acrylic based
- 4 colours: Limestone, Blue Lagoon, Black and Sandstone
- Resistant to algal and fungal growth
- Non-toxic/environmentally friendly

PONDITITE CLEAR

PondTite Clear is an environmentally friendly, easy to use, clear waterproofer for masonry water features.

It dries to a hard, non-flexible film that will not allow any surface movement.

Sizes available - 1L, 4L & 15L

Features & Benefits

- Dries clear
- Easy to use
- Environmentally friendly

TERRATITE

Bondall TerraTite is a brushable terracotta coloured waterproofing membrane specially designed for unglazed plant pots.

Bondall TerraTite is also suitable for permanent immersion in water. It is suitable for both interior and exterior use.

It is not suitable for swimming pools, spas, glazed & semi-glazed surfaces or plastic pots.

Sizes available - 500ml, 1L & 4L

Features & Benefits

- Forms a tough, flexible, seamless membrane
- Acrylic based
- Resistant to algal and fungal growth
- Non-toxic/environmentally friendly

DURATITE

Bondall Duratite is a durable elastomeric membrane, engineered to provide flexibility and increased strength.

Bondall Duratite remains watertight even under permanently wet conditions. The cured membrane is resistant to many chemicals.

This product is not recommended for foot traffic.

Sizes available - 1L, 4L & 10L

Features & Benefits

- Easy to use
- Water based
- Forms a tough, flexible, seamless membrane
- Resistant to algal and fungal growth
- Non toxic
- Environmentally friendly
- Suitable for interior/exterior use

WATERBASED BITUMEN SEALER

Bondall Water Based Bituminous Membrane is a general purpose coating for water proofing and protecting surfaces. It is reinforced with a rubber latex to provide flexibility and increased strength.

Sizes available - 1L & 4L

Features & Benefits

- Safe and easy to use
- Flexible
- Non-flammable
- Quick drying
- Excellent adhesion
- Safe for portable water
- Suitable for permanent immersion

SHOWERTITE

Bondall ShowerTite is designed to waterproof tiles and grout in shower recesses without having to remove the tiles.

Sizes available - 500ml

Features & Benefits

- Invisible moisture water repellent sealer.
- Non slip
- Proven technology.

EPOXY PREP

Bondall Epoxy Prep Surface Conditioner has been specifically formulated as a waterproofing substrate conditioner prior to applying **Bondall 'Tite'** products.

It can also be used as a water vapour barrier coating prior to laying floor coverings such as carpets, timber flooring and tiles etc.

Sizes available - 2L, 4L & 20L kits

Features & Benefits

- Environmentally friendly
- Excellent moisture barrier prior to using the **Bondall** range of products
- Stabilises dust and loose surfaces prior to over coating
- May be applied to a damp or green substrates prior to over coating

POLYWEAVE

Bondall Polyweave is a spun laced fabric, textile material composed of staple fibres entangled to form a strong reinforcing fabric.

It is designed to be used with **Bondall AquaTite, PondTite,** and **TerraTite** water proofing membranes.

Sizes available - 10 metres

Features & Benefits

- High tensile strength
- Wets up easily
- Resistant to water
- Resistant to chemicals
- Multi directional
- Resistant to rot

WATERPROOFING APPLICATION KIT

This kit contains suitable materials and application tools to permanently waterproof ponds, water features and shower recesses when used in conjunction with **BONDALL DURATITE, AQUATITE, POND TITE** (coloured) or **TERRATITE** flexible waterproofing membranes

Features & Benefits of Bondall Elastomeric Membranes

- Water based system
- Interior/Exterior use
- Tileable
- Quick drying
- Easy to use
- High sag resistance
- Extremely durable
- Long lasting
- High flexibility

HYDROCRETE

Bondall Hydrocrete is a water-resistant bonding and sealing agent.

It provides outstanding resistance to hydrolysis and is a perfect admixture for concrete and cement mortars.

Sizes available - 1L, 4L, 15L & 200L

Features & Benefits

- Water resistant
- Perfect for wet areas and exterior applications
- Contains a styrene-butadiene latex to provide excellent adhesion
- Ideal admixture for cement
- Bonds concrete to glass and metal

SILASEC

Bondall Silasec is a concentrated liquid waterproofing compound designed to be used with Type GP Cement (formally Portland Cement) to form a permanent waterproof barrier on masonry and concrete structures and floors.

It can be used on interior and exterior applications.

Sizes available - 1L, 2L, 4L, 15L & 200L

Features & Benefits

- A permanent waterproofing barrier
- Creates waterproof render or toppings
- Creates waterproof fishponds and pools
- Waterproofs tiles grout for wet areas
- Waterproof quick set cement repair putty
- Can be used in above or below ground applications

MULTI SURFACE WATERPROOFER

Bondall Multi Surface Waterproofer is an effective, all purpose transparent water repellent that penetrates dry, porous, exterior surfaces to form a water repellent barrier which helps to prevent water damage.

Bondall Multi Surface Waterproofer allows the treated surface to breathe enabling moisture vapour inside to escape whilst protecting against water penetration and damage. It is not recommended for protection against total immersion in water.

Sizes available - 1L & 4L

Features & Benefits

- Penetrating sealer
- Allows the surface to breathe
- Usable on a variety of surfaces
- Can be painted over

THOMPSON'S WATER SEAL

Thompson's Water Seal is a transparent, solvent based water repellent that is designed to penetrate dry, porous, exterior substrates to prevent ingress of moisture.

Thompson's Water Seal is unique in its versatility in waterproofing most porous building material such as brick, concrete, wood, stone, slate etc and also natural fabric such as cotton and canvas.

Sizes available - 1L, 5L Bonus & 20L Bonus

Features & Benefits

- Transparent
- Low viscosity
- High penetration
- Solvent based
- Perfect for brick, concrete, masonry, slate and wood substrates

THOMPSON'S WATER SEAL ULTRA

Thompson's Water Seal Ultra is a unique high performance transparent water repellent that penetrates exterior brickwork and cementitious substrates.

It is suitable for exterior brickwork, pointing, rendering and concrete type surfaces. It is not suitable for wood substrates.

Sizes available - 1L & 5L

Features & Benefits

- Transparent
- Lasts as long as most conventional water repellants
- One coat is normally sufficient from most substrates
- Non-staining
- Low viscosity
- High penetration
