Note:      Hardware contained in photography may vary  
                 from state to state due to supplier, supplier's  
                 availability or maybe by special request.

Windows and doors are the connection between rooms and the outside world. They allow light and air into the house and enable you to see the world outside while protecting from wind and rain. They keep us warm in the winter and cool in the summer.

Synergy® uPVC window and door systems by Trend® are the connection - the inspiration.

Synergy's attractive design and dimensional stability minimise energy costs and increase comfort. The optimum sound-insulation allows you to enjoy the peace and quiet in your home while the maintenance-free, weatherproof and UV stabilised material guarantees a long-lasting attractive appearance.

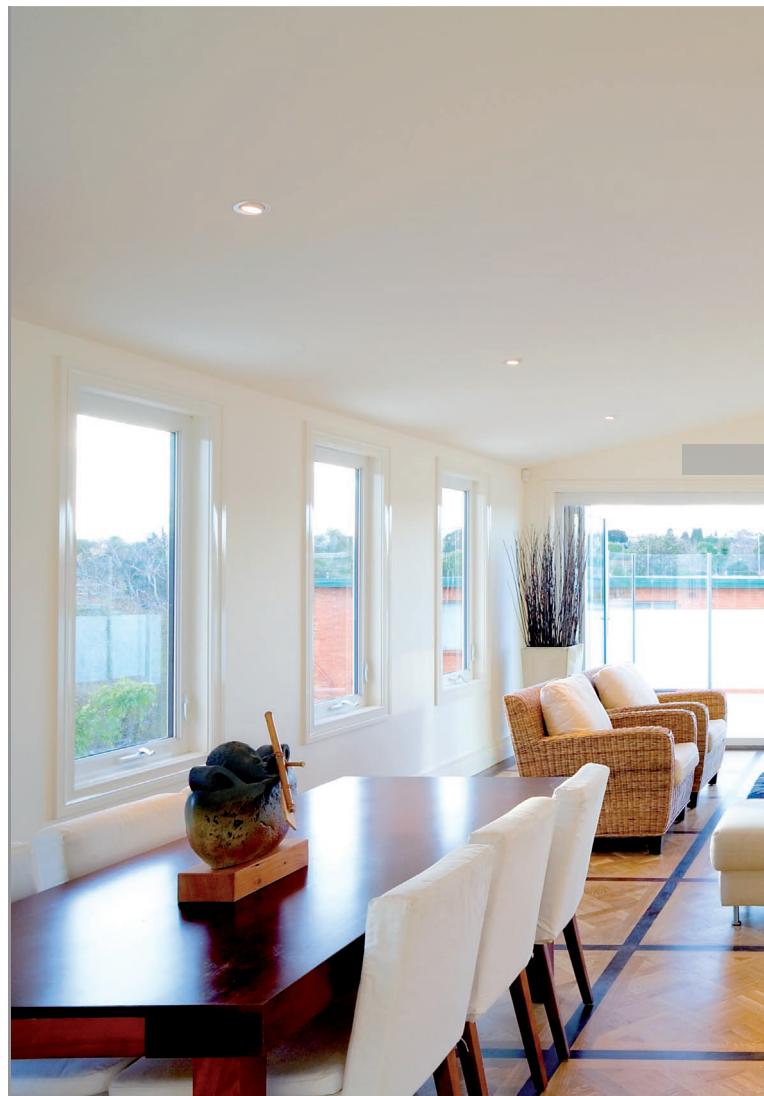

A multitude of options and styles in window and door combinations are available, as are energy efficiency and acoustic options.

Synergy® uPVC products are made from materials creating a unique result that fully comply with AS 2047.

All glazing is internally fitted, eliminating the requirement for external scaffolding.

## Awning Windows

Synergy® Awnings windows allow for the window to be used in even the most inclement weather situations while still getting airflow.

Synergy® Awnings windows can be combined with other window types to create very dramatic feature walls of glass. These combinations can give clean lines and proportions to your home improving the entire aesthetic look and feel.

The hardware allows for the window to be wound out, to suit the climate and has dual locking handles for security. This ensures that when closed the sash is airtight to the elements achieving zero air infiltration which is excellent for dust, noise and energy efficiency.

The sleek bevelled edged design is aesthetically pleasing allowing for improved peripheral vision from inside to outside the window.

## Awning Features

- 25mm Double Glazed Unit
- Dual Bulb seals for outstanding seal ability
- Truth, smooth, scissor style operator
- Truth dual locking handles for added security
- Bevelled edge sash design

## Casement Windows

Synergy® Casement windows are hung on Truth adjustable stays on either the left or right side of the opening.

The Synergy® Casement is engineered with heavy-duty hardware to allow for a full 90 degree opening, permitting even the slightest breeze to be directed into the house. The multi-point locking system is standard to ensure that when closed the sash is airtight to the elements achieving zero air infiltration which is excellent for dust, noise and energy efficiency.

The hardware is activated from a single point for functional locking.

The frame and sash is designed with heavy sections to ensure that even in the strongest winds the sash will not rattle or slam.

The sleek bevelled edged design is aesthetically pleasing allowing for improved peripheral vision from inside to outside the window.

The window is able to be open a full 90 degrees, to allow for easy cleaning and fire egress.

## Casement Features

- 25mm Double Glazed Unit
- Dual Bulb seals for outstanding seal ability
- Bevelled edge sash design
- Heavy-duty hardware
- Multi-point locking system, which operates from a single point
- Opens 90 degrees for easy cleaning and fire egress
- Insect screens are available utilising spring clips
- Adjustable Truth hardware stays allow for fine onsite adjustment

## Sliding Windows

Another aesthetically pleasing Trend® Synergy® design, it is sleek, operates with ease and gives you maximum glass area. It is the perfect solution where other window types would be in the way.

The sash can be lifted out to the inside of the home for easy cleaning.

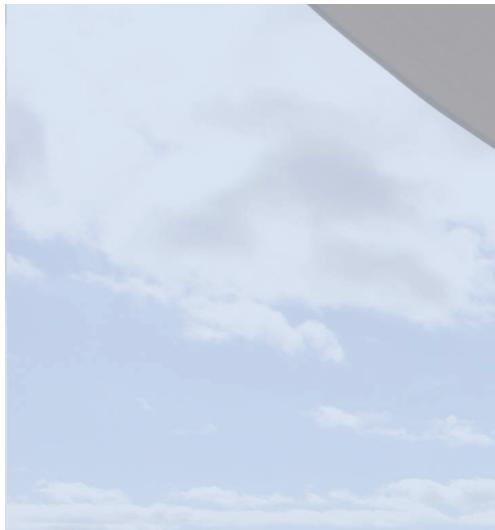

The Synergy® slider is a highly energy efficient window that is designed to slide without compromising performance, value and comfort of your home.

## Sliding Features

- High quality dual rollers for smooth operation
- Triple fin enhanced interlocking meeting rail
- 25mm Double Glazed unit
- Snap lock-sliding track removable for easy cleaning
- Lift out sash for easy cleaning
- Insect screens are available
- Basic lock push button operation

## Picture and Bay Windows

### Picture

Synergy® Picture and Bay windows are an irresistible way to provide you with uninterrupted views of the outside world.

While they do not ventilate, they provide for maximum visible light and can make rooms appear larger, brighter and more spacious. The sleek bevelled edged design is aesthetically pleasing allowing for improved peripheral vision from inside to outside the window.

Picture windows can be combined with any other window style to create truly unique combinations that can improve the entire aesthetic look and feel of your home.

Synergy® Picture Windows can be made into many dynamic geometric shapes. Use your imagination and design the window you want. Trend® will custom make it for you.

### Bays

Bay windows create additional space and dimension to the room. Trend® can create every dimension using your creative design or can construct one that will suit your project.

Trend® will handcraft each unit using any combination of operable windows or configuration ensuring the perfect window for your home.

### Bay Features

- Multiple combinations are available utilising any window type
- Size is limited only by standards
- Bevelled edge sash design
- 25mm double-glazing

## Patio Sliding Doors

The right Patio Sliding door can be a critical component for a busy traffic area of your home, that's why a Synergy® Patio Sliding door will ensure that you are buying reliability and quality.

Trend® has created a smooth-rolling door that offers you reliability, performance and great looks, which is easily operated and glides with ease.

The hardware has security in mind, with a keyed lockset.

Whether you are looking into the garden contemplating the view, sitting at the breakfast table taking in the sunrise or just feeling a fresh breeze throughout the room, a reliable, energy efficient Synergy® Patio Sliding Door will improve the outlook of your house.

## Patio Sliding Door Features

- 25mm Double Glazed Unit
- Heavy duty, reinforced main frame
- High quality dual rollers for smooth operation that is a non-corrosive, technologically advanced composite material
- Screens are available
- 130mm jamb thickness
- Can be custom made

## Hinged Doors

Synergy® hinged doors are a creative focus of each facade. The appearance is elegant, attractive and versatile, while at the same time, thoroughly reliable. Protection against the elements and maximum degree of security is a feature of this door.

They are equipped with additional reinforcing and triple point locking as standard, safety fittings and special glazing for added security.

With unrivalled variety, both in terms of form and design, they meet the most demanding of requirements, both individually and tailor-made. Single or double for large houses, in classical or modern design, suitable for all types of installation both in new constructions and renovations.

## Hinged Door Features

- Optimum stability with designed metal reinforcements with integrated edge weld joints
- 25mm double-glazing
- Continuous seals down to the floor act as draught-insulation

## ORDERING DETAILS

All doors are illustrated as viewed from the outside. Codes shown are for plain doors. The first two numbers indicate approximate height. The last two numbers indicate approximate width.

White hardware is supplied as standard.

Low profile sill supplied as standard.

## WINDOW RATING

All Trend® Windows & Doors are made to meet Australian Standards regulations AS2047 and AS1288.

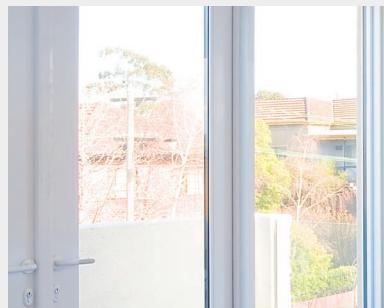

These standards relate to glass type, wind pressure and water penetration ratings. So that we can make sure you have the right window for your area, we need to know your specific location prior to quoting and manufacture. This is further explained in AS2047.

"The applicant for building approval or the approving authority shall nominate the window rating appropriate to the location of the building."

The minimum rating for each wind classification and a guide to the design wind pressure are set out in AS2047.

The minimum rating for housing is set out in AS2047.1, and the design window pressure for buildings other than housing shall be established appropriate to the location of the building."

Information on determining the window rating specification is available from AS4055, the Australian Window Association, or Trend® Windows & Doors.

# EXTRA FEATURES

## THERMASHIELD

The only thing predictable about the weather is that it can and will exert an impact on your comfort and your lifestyle. When it comes to battling the heat or cold, the impact can easily transfer to your hip pocket. But protecting a home from the elements is a serious and, at times, complicated consideration. That is why, when it comes to creating a better environment, you cannot go past Trend® Windows & Doors Thermashield®.

Trend® Thermashield® means greater control, bigger savings, and most importantly, one less thing to worry about.

Thermashield® - putting CLIMATE CONTROL together.

For further information speak to our Sales Trend® Consultants.

21

### HOT CLIMATE

In climates where the largest energy load is in cooling the home, the following Thermashield® window options are recommended. We have listed your options broadly from 1 to 9 (the large numbers to the far left of the table). The higher the number, the more protection from the heat.
