

iRobot® Scooba™

Floor Washing Robot

Model **385**

“Drop the Mop” ...iRobot's Scooba is here!

safe on hard floors ✓

- No programming required
- Simple to operate

Fill the tank with water and vinegar solution, start the cleaning cycle and empty the tank when finished.

iRobot® Scooba™

Floor Washing Robot

Cleans routinely... so you don't have to

Preps, washes, scrubs and dries
sealed hardwood, tile and lino floors on its own.

iRobot's patented floor washing robot washes your floors at the touch of a button, whether you're home or not. The Scooba 385 uses intelligent algorithms and cleaning behaviours to clean up to 79 square meters (or up to 4 average size rooms) on a single battery charge. It navigates throughout each room using a powerful 4-stage cleaning system to prep, wash, scrub and dry sealed hardwood, tile and lino floors. Scooba uses only clean solution (tap water and vinegar) to wash floors. The ultimate multi-tasking machine even cleans beneath cabinet edges, tables, chairs and other hard-to-reach places. The Virtual Wall marks off-limit areas, with an adjustable infra red beam, keeping Scooba where you want it.

4-stage cleaning process:

1. **Preps** - picks up dirt, sand and crumbs
2. **Washes** - uses only clean solution to wash floors, never spreading dirty water around like a common mop
3. **Scrubs** - powerful brush removes dirt, grime and stuck-on messes
4. **Dries** - squeegee lifts dirty water from floors leaving them clean and dry

Product Features & Benefits:

- Ideal for homes with larger hard floor areas. One full tank washes up to 40 square metres before it requires refilling.
- Autonomous cleaning pattern covers each area of floor multiple times to ensure total floor coverage.
- Cliff Sensing technology allows Scooba to avoid stairs and ledges.
- Virtual Wall creates an infrared beam that Scooba will not cross. Use the Virtual Wall to mark off-limit areas in your home.
- Uses clean tap water and vinegar solution from start to finish, leaving your floors cleaner.
- One-year manufacturer's warranty.

What's in the box

- iRobot® Scooba® 385 Floor Washing Robot
- Measuring cup
- Rechargeable Advanced Power Supply (APS) Battery
- Power Supply
- 1 Virtual Wall (requires 2D batteries, not included)

Model 385

Preps, washes, scrubs and dries sealed hardwood, tile and lino floors on its own. It cleans beneath cabinet edges, tables, chairs and other hard-to-reach places while automatically avoiding rugs, carpets and stairs.

- Covers up to 4 average size rooms per battery charge
- 1 Virtual Wall to block doorways & off limit areas that you want Scooba to avoid
- Cliff sensors stop Scooba from falling down steps and drops
- Separates dirty water from clean with individual water fill inlets.

4 cleaning methods in 1 pass

- 1 Preps - picks up dirt, sand and crumbs
- 2 Washes - uses a water and vinegar solution to wash floors (mops just spread around dirty water)
- 3 Scrubs - powerful brush removes dirt, grime, stuck on messes and spills
- 4 Dries - squeegee lifts dirty water from floors leaving them clean and dry.
