COME CLOSER TO PERFECTION

Custom Made Products

At Tesrol, it's not just about the doors. It's about style, innovation, service, product knowledge and experience in helping you create your dream home.

The Tesrol® brand was established in 1980 by the Fernandez family. Since that time we have set the industry Benchmark in Quality, Innovation and Service. Today Tesrol is a dynamic and highly driven organisation focussed on providing Premium Quality Products for your dream project. One of Tesrol's strengths is our ability to create the largest range of matching accessories available in Australia. Our dedicated design team is constantly developing new and exciting products to meet customer demands. Tesrol can also custom design items to suit your individual needs if required.

VACUUM FORMED

Tesrol has engineered the process of bonding quality PVC foil to a moisture resistant MDF substrate. We constantly monitor this process with the latest advances in technology and quality materials which make this product range even more durable. The end result is a sealed door with a seamless look and superior quality.

Finishes available are the latest European and Local trends selected by top designers resulting in over 60 colour finishes in texture, matt, wood effect and high gloss, making vacuum formed the number one choice. [Vacuum Formed products are covered by a 7 year limited guarantee on manufacturing and material faults.](#)

POLYURETHANE - Painted

Polyurethane (Two Pack) is manufactured by spraying a number of coats of High Grade paint onto a highly moisture resistant MDF substrate. Tesrol will supply all popular brand colours by name, offering you a virtually unlimited choice of colour.

Finishes available: Texture, Satin or High Gloss in solid colours only.

HAND - Painted

Tesrol can supply all products shown in this brochure routed ready for your Cabinet-maker or Painter to complete. This added freedom will allow you to achieve individual themes such as French Provincial or Milk Wash Finish.

TIMBER VENEER

Timber veneer offers the warmth and individualism of Solid Timber with the clean lines of a Modern or Contemporary Style Design.

SOLID TIMBER

Solid Timber doors are a timeless classic. Manufactured by traditional methods using state of the art technology, each door is individually assembled with its own unique grain features. Many Australian and imported species are available together with an extensive range of door styles and accessories.

ALUMINIUM FRAMED DOORS - Page 25

These exciting new aluminium framed doors complement our comprehensive range of Vacuum Formed, Routed, Painted and Timber cabinet doors and gives our customers a one-stop-shop for all their cabinet door requirements. This superior product range is aimed squarely at the discerning buyer and provides a modern and elegant addition to any home.

[Aluminium Framed door products are covered by a 10 year limited guarantee on manufacturing and material faults.](#)

- The Open version is available in Timber & Painted, and the closed version is also in Vacuum Formed.

SKIRTING

- Matching Skirting is an important aspect of getting you project looking perfect.
- Available in Vacuum Formed, Painted & Solid Timber.

CARE & MAINTENANCE

Caring for your Tesrol Doors

Your Tesrol Doors and Panels are easily cleaned using a solution of mild soapy water and a soft cloth.

More persistent stains may be treated with methylated spirits followed by soapy water. Never use solvent based or abrasive cleaners which could damage the surface.

Excessive heat can cause damage, so it is important to ensure the following.

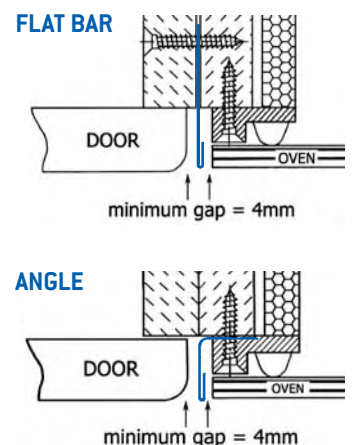

- Always use your rangehood when cooking.
- Avoid having toasters, coffee machines etc. in a position where heat is constantly being subjected to the product's surface.

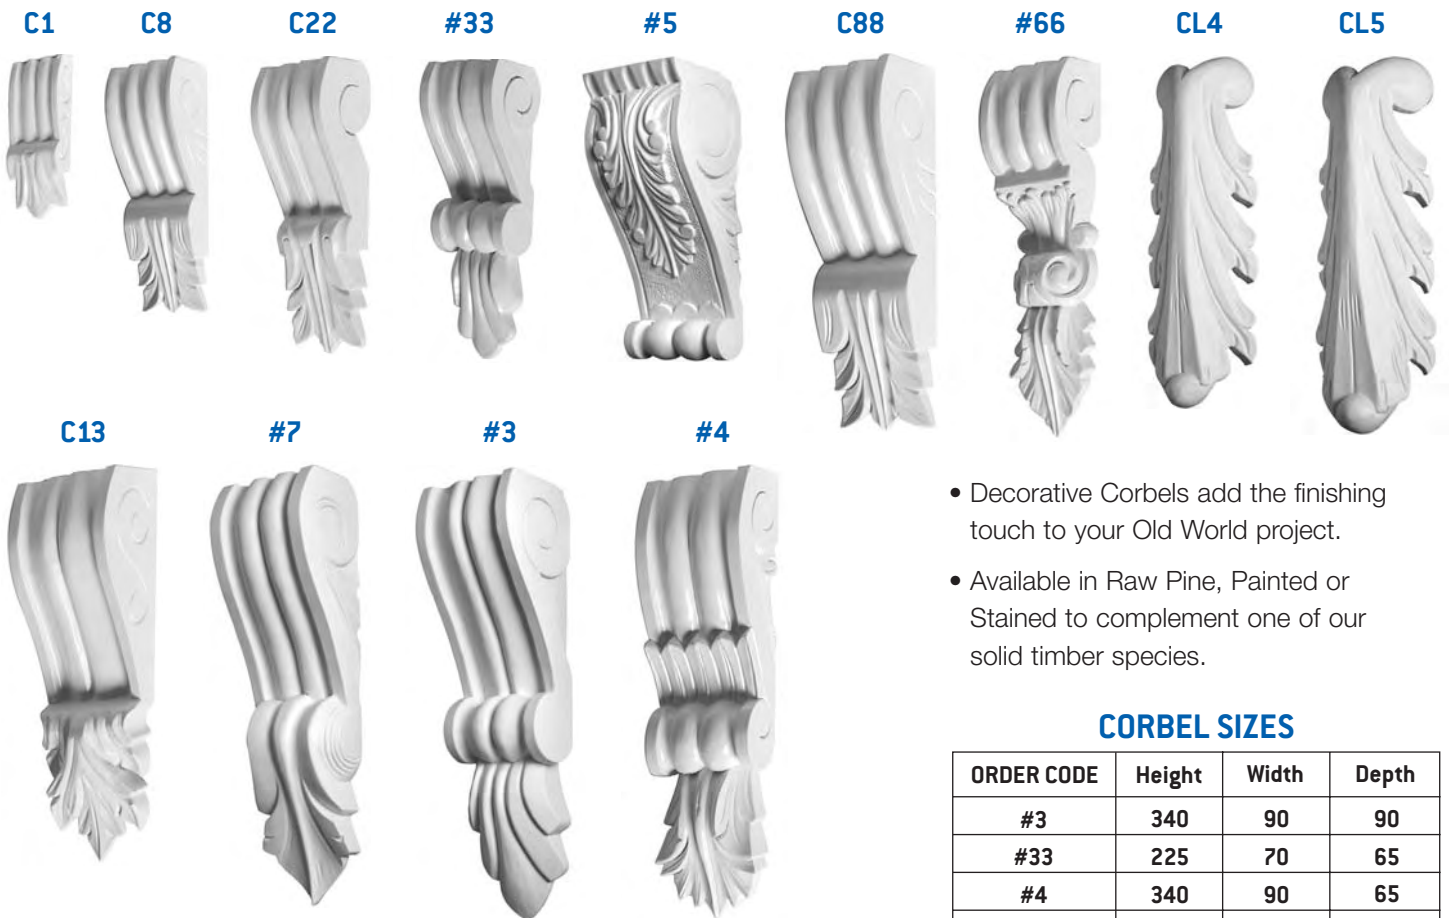

Heat Deflectors

Some ovens which are flush mounted are not designed to deflect heat away from Surrounding surfaces.

Important to ensure the following.

- Tesrol supply Heat deflector strips in black, white or chrome, which must be used to protect your doors and panels.
- Failure to correctly install heat deflectors may void the product warranty.

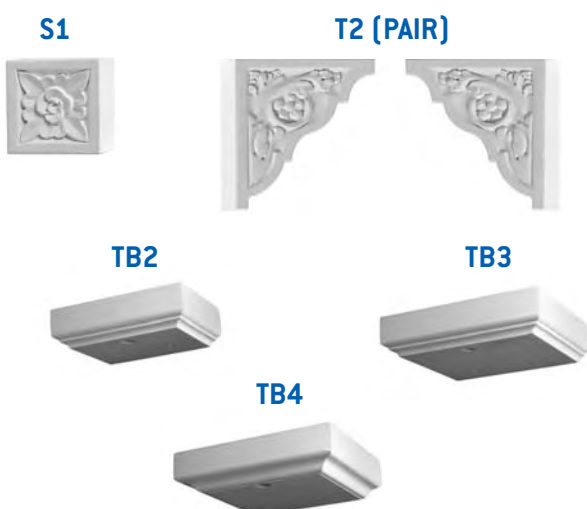

- Decorative Corbels add the finishing touch to your Old World project.
- Available in Raw Pine, Painted or Stained to complement one of our solid timber species.

CORBEL SIZES

ORDER CODE	Height	Width	Depth
